

## 350P Defibrillator

**Dominating with quality defibrillators produced in Ireland**

Longest warranty - Extensive 10 years as standard & free lifetime after care with all devices. Others say 4 or 5 year available but don't really give customer support. We give the best after sales service. Call us today with any questions you may have

### Forward Hearts

When our defibrillators are used to save a life. We will give the survivor a Free Defibrillator which they can donate to a worthy group, club, school or organisation of their choice. Offering others a better chance of survival in the case of sudden cardiac arrest.

## Compact in Size. Big on Ability

**Portable and lightweight.** At only 1.1 kg, weighs less than other portable defibrillators.

**Highest level of dust/moisture protection.** The PAD has a rating of IP56, with the highest level of protection

**Durable.** The PAD 350P carries a ten-year unit warranty as standard that demonstrates the reliability of this quality unit.

**Advanced technology.** utilizes proprietary electrode technology, advanced and stable firmware, and SCOPE™ Biphasic

## Real Economy for the Real World

**Two parts, one expiration date.** Pad-Pak cartridge combines battery/electrode pads, with one expiration date to monitor.

**Low cost of ownership.** the 4 Year Pad-Pak offers significant savings over other AED's that require separate battery/pads.

**Protects both adults and children.** The PAD's built-in intelligence and unique Pediatric I

**Field upgradeable.** Easily upgrade in the field to the latest AHA/ERC guidelines.

### Graphical Interface

**Battery & Pads In One**

## Easy-to-Follow Visual and Voice Prompts

**User-friendly.** The PAD 350P features easy-to understand visual and voice prompts that guide a user through the process, including CPR coaching. Easy as "Attach pads," "Do not touch the patient," and "It is safe to touch the patient".

**Two-button operation.** Only two buttons, ON/OFF and SHOCK, are required for straightforward operation.

**Always ready.** A System Status Ready Indicator flashes to show that the complete system is operational and ready for use.
